

"Environmental" Report

This report describes the annual wind distribution and rainfall for any site. It is often a prerequisite when making applications for quarrying or landfill.

For any site, for the year as a whole, this report presents:

- * The distribution for all hours of mean wind speed and direction
- * The proportion of all hours that are calm
- * The average number of days for each month that are "dry" (ie <0.2mm rain)
